## Opportunities, Advantages, Attractions and Resources

---

NEW BERN was founded by the Swiss settlers in 1710 and for over two centuries it has enjoyed steady growth and increasing prosperity and happiness, which naturally blesses a community. Ideally located, made up of energetic, inventive and thrifty people, it is now rapidly growing in greatness; commercially, financially and in point of quickened civic spirit.

New Bern was named after Bern, Switzerland, which means "Bear" in the Swiss language. The entire South is throbbing with a new and mighty energy and great development of her unbounded resources and opportunities. The commercial awakening of the South is very significant. It is claimed to be increasing at a rate conservatively estimated over \$7,000,000 a day. New Bern is splendidly playing its part in this theatre of progress and prosperity.

New Bern is located at the junction of two beautiful, deep rivers—Neuse and Trent—near the entrance of Pamlico Sound and 30 miles from the Atlantic Ocean. It is in the center of the great cotton, lumber and agricultural belt of the South Atlantic Seaboard. It is 87 miles northeast from Wilmington, 197 miles southeast of Raleigh, 171 miles South from Norfolk, and 377 miles south of Baltimore.

New Bern is reached by the Atlantic Coast Line Railroad, the Norfolk Southern Railroad and by water. There is double daily service in all directions; only one hour's ride to the mighty Atlantic, 6 hours to Norfolk, 10 hours to Richmond, 15 hours to Baltimore, and 19 to New York, with through Pullman service between Washington and New Bern.

New Bern has unsurpassed climatic conditions. A happy medium between the blizzard-beaten and drouth-scorched North, West, and Northwest and the enervating climate of the South. It is only 57 miles from the Gulf stream, insuring a mild and delightful climate the year round—abundant sunshine, moderate temperature and an ample and well-distributed rainfall. Mean annual temperature, 63; annual rainfall, 55 inches.

New Bern owns its water works system and electric light plant. It has 18 miles of sewers, 28 miles of paved sidewalks, 12 miles of paved streets and other modern conveniences in keeping with cities twice the size.

New Bern has an excellent health record. The death rate is as low and longevity as great as any place in the State. Drinking water is supplied from deep artesian wells, is wholesome and under sanitary regulation. A modern sewerage system is in operation.

New Bern has three banks, with combined resources of over six and a half million dollars and deposits of over \$5,000,000. It also has a Morris Plan Bank and two building and loan associations. Banking institutions are the backbone of a community. No banking houses in the State look after the interest of their depositors more considerately and liberally than do the banks of New Bern. Well-conducted banking houses are one of the greatest assets a growing community can possess, and New Bern has them. In three United States Liberty Loan campaigns for prosecution of the war against Germany the New Bern banks subscribed one million two hundred and fifty thousand dollars, which was a large over-subscription.

New Bern is noted for the manufacture of the celebrated North Carolina pine lumber, as well as other varieties for which it is famous. Several of its mills are the largest and best equipped in the country. New Bern ranks first in the production of lumber in North Carolina, producing approximately 200,000,000 feet annually.

New Bern is the second largest fertilizer manufacturing center in the State, the annual output being near 100,000 tons.

New Bern also has a large cotton oil mill and factories manufacturing men's suits, ice cream, axe and pick handles, boilers, machinery, boxes, barrels, veneer and ply-wood boards, agricultural implements, etc., and is a leader in ship building in the State. It also has the Norfolk Southern Railroad shops.

New Bern has first class mercantile establishments that carry a full and complete line of goods. They are guided in their dealings with the public by courtesy and service. New Bern has the largest department stores in Eastern North Carolina.

New Bern is well equipped with a full modern school system, most efficiently administered by Prof. H. B. Smith, the superintendent, and a corps of able assistants. New Bern is proud of its educational advantages.

857024

New Bern is blessed with a full complement of churches of practically all denominations. The Methodists, Presbyterians, Baptist, Disciples, Episcopalians, Roman Catholics, Hebrews and Christian Scientists all have their houses of worship.

New Bern has a good system of government, which is economically and efficiently administered.

New Bern has two daily newspapers that are ably managed and edited and which are superior in general make-up to papers published in much larger cities.

New Bern is surrounded by most excellent hunting and fishing. There are 30 square miles of water for boating and fishing within 16 miles of the city. All kinds of game are to be found in the woods around. The New Bern section offers the greatest pleasure to sportsmen. The fish and oyster market of New Bern is widely known.

### HISTORIC SPOTS OF NEW BERN, NORTH CAROLINA.

The southwest corner of Broad and East Front Streets, now occupied by the home of Mr. and Mrs. Francis Duffy, is of much historic interest. Here in 1749 James Davis, of Virginia, established an office, set up the first printing press in North Carolina and printed the laws of the State, which had hitherto been in manuscript. They were bound in yellowish, poorly tanned leather and the volume was known as "The Yellow Yacket."

In June, 1764, Mr. Davis issued in New Bern "The North Carolina Magazine," or "Universal Intelligencer," the first periodical paper attempted in the province. John Davis, the son of James Davis, was whipped to death at Wilmington years later, refusing to perform service demanded of him for the British fleet.

On the same block stands what is said to be the oldest house in Craven county, the brick kitchen of the old Haslen house, which stood about where the home of Mr. T. G. Hyman is now. The Haslens were relatives to the Custis family, members of which lived in New Bern until recent years. Here visited when a mere lad Thomas Benson, afterwards Archbishop of Canterbury. This place occupied most of a block, was laid out by a famous landscape gardener, and was one of the show places of this section.

In 1764 William Tyron arrived in North Carolina with a commission as lieutenant-governor and in 1765 he was made commander-in-chief and captain-general of the colony. By two separate appropriations Governor Tyron obtained 15,000 pounds from a province hardly able to pay the ordinary expenses of government; to this he added school funds which had been raised with difficulty, and in 1761 he let the contract for Tyron's Palace, the building of which we are told by some historians had more to

do with precipitating the Revolution than any other single event. Six acres had been condemned, bricks and other material were imported from England and the result was indeed imposing, in fact a famous South American, Don Francisco Miranda, who visited New Bern at this time said that it was without doubt the finest building in the new world. In the main building were the legislative halls and rooms for government use; some say that the left wing was the private residence of the governor, the right the laundry and servants' quarters; others, that the right was the secretary's office and laundry, while that on the left served for kitchen and servants' hall. In 1792 the building was used as a school and the arms of Great Britain still appeared in front. The academy had been burned and permission had been granted for its use by the legislature. In 1791, when General George Washington visited New Bern, he stabled his horses in the right wing, which is the only part still standing. For a long time Rev. Thomas Irvine, while conducting school in the building, stored wood and hay in the cellar under the council chamber, living with his family in the upper part. In 1798 a colored woman, who was looking for eggs in the cellar, kindled a fierce blaze with a lightwood torch and the central building and west wing were totally destroyed. Unfortunately the remaining part is privately owned, and since no particular effort is being made to preserve it, it is deteriorating badly, being occupied now by two or three families.

Across the Trent from New Bern at this time might have been found "Cleremont," or "Claremont," the home of the Moores and Spaight; beyond it the home of the Bryces and Gastons, and divided from these by a creek, Pembroke, the home of the Nashes.

On the corner of Middle and New (once Neuse) Streets stands the home of Colonel James A. Bryan, formerly the home of John Stanley, begun before the Revolution. It is built of logs dovetailed at the corners and is a very beautiful place still, occupying half a block. Here Washington was entertained during his visit to New Bern in 1791. Here Mr. Stanley also entertained General Nathaniel Green when his army was famished and half naked and lent him 40,000 pounds for these suffering heroes before allowing him to depart. Hon. Edward Everett lifted his hat on passing this house and said, "Once the home of patriots and statesmen." Tradition says that Lafayette visited New Bern and was entertained on upper Pollock Street. New Street was once famed as the residence of men of many talents. Here might have been found the mansion of Hon. William Blackledge, the house and law office of Judge William Gaston, the residence of the younger Governor Richard Dobbs Spaight. At the beginning of New Street was the noted "Emory House," belonging to Judge Manly on the Supreme Court bench of the State (home of Mr. E. K. Bishop). Here was entertained President Monroe and Hon. John C. Calhoun. This house is still standing, though it has been entirely remodeled. Farther up New

Street stands the old academy. This school was first incorporated in 1766, the first incorporated academy in North Carolina, and for years only a "churchman" could be its principal. In 1795 the building was burned and the one now standing was erected in 1806. Many of the great men of North Carolina were born and lived in New Bern and most of them obtained a part of their education in this very building. Of these I will mention only Gaston, Stanley, Badger, Spaight and Hawks. The first building was of wood and in it the lower house of the legislature sometimes met. Just next to the academy stood the old Roberts house, occupied by Hon. J. L. Taylor, Chief Justice of the State.

On the corner of Broad and Burn Streets is the old Sitgraves lot (now occupied by the Christian church), on which stood formerly the house in which Governor Martin took refuge when feeling was running so strongly against him in this section. Reports say that during the day he concealed himself carefully but sallied forth at night. One of his letters to General Gage had been intercepted and his plans revealed, hence his unpopularity. On April 24, 1775, he fled to Wilmington and joined Lord Cornwallis shortly afterwards.

In 1740 an act was passed by the legislature for the building of an Episcopal church in New Bern; the building was completed between this date and 1754. A new church was completed in 1824, burned in 1871, and rebuilt as it now appears. Valuable gifts from George II to this church are still in its possession (communion service and alms basin, Bible and Book of Common Prayers). The church yard was used as a burial place and many interesting graves still remain. One tombstone contains the following inscription, which has occasioned much remark: "Here lies an honest lawyer indeed."

Cedar Grove Cemetery was opened by Christ Episcopal Church of New Bern in 1880, transferred to the authorities of the town in 1854. One attraction of this cemetery is its wall of shell rock, a queer formation peculiar to this section. The gateway, which is most unusual and of the same material, absorbs and retains rain which falls to the ground drop by drop, thereby earning its name "Weeping Arch."

On the corner of Pollock and Middle Streets, beside the Episcopal Church, is a cannon which has been converted into a drinking fountain within the last few years. This cannon was captured by a privateer belonging to John Stanley, of New Bern, from a British ship to which Lady Blessington had presented it during the War of 1812. This cannon was an important point in the formal laying off of the city as it now appears.

On the corner of Hancock and Johnson Streets stands the Masonic building, erected in 1804, remodeled several times since. On or near this lot was fought the famous Stanley-Spaight duel (1804), which resulted in

the death of Richard Dobbs Spaight. George Washington attended Masonic lodge in this building.

The Presbyterian church, a modern building still standing, was started in 1819, dedicated in 1821. The original pulpit and pews have been removed. Visitors are surprised on entering to find themselves facing the congregation. One of its founders was Mrs. Eunice Hunt, a daughter of Jonathan Edwards, the great Divine, president of Princeton College. An original deed for a pew in this church is now in existence.

On the corner of Pollock and Hancock Streets was the home of Dr. Elias Hawes, who conducted the first absolutely free school in North Carolina. In the yard Dr. Hawes kept a pile of bricks and a wheelbarrow and every day he required his pupils to move that pile across the yard for exercise. As a surprise and a reward for obedience he showed the children some matches, the first they had ever seen.

# Advertising New Bern

Do you know that a copy of this Directory of New Bern is being placed in the Directory libraries and among the commercial bodies, Business Men's Clubs, Chambers of Commerce and the larger business institutions throughout the United States?

No other medium on earth can convey so complete and comprehensive an index of the city, its various industries, its business, educational and religious institutions, its social life and its people.

No other medium can tell so fully of its wonderful growth, its opportunities and its possibilities for the future.

The publishers are doing everything possible to make this Directory a representative city catalog of New Bern. Are you as prominently represented as you should be?

MANUFACTURERS

## Cotton Seed Products and High Grade Fertilizers

Factory and Mill: Riverside, Neuse River  
New Bern, N. C.

Local and Long Distance Telephone Nos. 124 and 125

Why buy fertilizers from foreign manufacturers when you can get such excellent and effective goods from your home people?

We make a specialty of Cotton Seed Meal and Fish Fertilizers, using other Ammoniates when necessary, and properly balancing the mixtures with German Potash and Acid Phosphate.

Our facilities for manufacturing and loading on cars, boats or trucks have been doubled within the past year, which enables us to fill all orders promptly.

We are making the same brands this year as heretofore—knowing that they have been tried and have proven perfectly satisfactory. In tobacco fertilizers we have been particularly successful. Some of our favorite brands are:

**Oriole Tobacco Grower, 8-4-4**

**Pitts Prolific Golden Tobacco Guano, 8-3-3**

**Lenoir Bright Leaf Tobacco Grower, 8-3-3**

If you need goods for truck, cotton, corn or peanuts, we can supply you with brands made especially for these crops.

## Cotton Seed and Products

We are always in the market for cotton seed and will pay the highest market price at any time. We will also give you a liberal amount of cotton seed meal or fertilizers in exchange for seed. Write us for prices.

We are in the market for soya beans and will thank you to advise us when you have any for sale.

We are agents for the sale of the Gordon Bean Harvester and Little Giant Bean Harvester.

The Association of North American Directory Publishers is composed of reputable City Directory Publishers, organized for the general advancement of the Directory business. Any person, corporation or firm engaged in business as owner and publisher of a City Directory in the United States or Canada, who shall qualify as competent to gather information and compile a City Directory and furnish satisfactory references, is eligible to membership.

The objects of the Association are:

First: The advancement of the Directory business and the improvement of Directories by the interchange of ideas and the exchange of experienced employees.

Second: To provide protection to the public against fraudulent advertising schemes which operate under the name of Directories, and to drive unprincipled promoters of the same out of business.

Third: To provide permanent and profitable employment to competent, industrious and honest Directory canvassers and compilers.

Fourth: For the mutual protection and advancement of the established and prospective interests of all who may become members, by personal advice and assistance of members as may be mutually satisfactory, desirable or advisable, and by such other means as may, from time to time, be shown to be wise, proper and lawful.

All members of this Association have subscribed to the following

## STANDARDS OF PRACTICE

1. To consider, first, the interest of the user of the book.
2. To subscribe to and work for truth, honesty and accuracy in all departments.
3. To avoid confusing duplication of listings, endeavoring to classify every concern under such headings as best describe it, and to treat additional listings as advertising, to be charged for at regular rates.
4. To increase public knowledge of what Directories and reference media contain; to study public needs and make Directories and reference media to supply them; to revise and standardize methods and classifications so that what is wanted may be most easily found, and the Directory and reference media be made to serve their fullest use as business and social reference books and Directories of buyer to seller and seller to his market.
5. To decline any advertisement which has a tendency to mislead or which does not conform to business integrity.
6. To solicit subscriptions and advertising solely upon the merits of the publication.
7. To avoid misrepresentation by statement or inference regarding circulation, placing the test of reference publicly upon its accessibility to seekers as well as on the number of copies circulated.
8. To co-operate with approved organizations and individuals engaged in creative advertising work.
9. To avoid unfair competition.
10. To determine what is the highest and largest function of Directories and reference media in public service and then to strive in every legitimate way to promote that function.

\$100 reward will be paid by the association for the arrest and conviction of any person or persons engaged in publishing, collecting or canvassing for any fraudulent or fake Directory.
