PRO BONO PUBLICO

PREFACE

In submitting Volume II of the Gastonia, N C City Directory, it is gratifying to note the progress that is being made in industries and growth of population.

A great factor in the upbuilding of any city is its civic pride; the fact that your citizens stand as a unit on everything that affects the prosperity of your city is worthy of commendation.

The City Directory is one of the foremost enterprises of any city; it is generally referred to by the press of the whole country as a semi-public institution of great value.

The Directory is more than a mere list of names of residents, giving their various occupations and addresses, it is an infallible guide to your city, for your people and for the stranger within your gates. It not only deals with your people, but with your government, your institutions and various other organizations. It is a recognized standard work of reference and becomes the most reliable history of your city and its citizens. As there is no other publication in the world which gives the information as contained in the City Directory, there is probably no other publication in which all the people are so vitally interested.

To gather the data and compile a volume of this character is no easy task. It requires time, a well defined system, acquired only by years of experience, the patience of Job and incurs no little expense. Few people have any idea of the work it means and the tenacity it takes to publish a reliable directory.

In preparing this book the publishers have spared neither time nor expense, and if errors occur or a single name is omitted which should appear in the work, it is generally the fault of the public and not of the publisher, as every house is visited and it is not the publisher's or canvasser's fault if some one fails to give all the information or gives it incorrectly. The intentions of the reliable publisher are always for improvement, and you can always count on getting as accurate a directory as circumstances will permit. No directory is perfect.

The estimate of the population of a city is a matter necessarily enjoined upon the directory publisher; such estimates, however, are not merely theoretical, but based on facts, sustained by the contents of the publication.

This volume contains 4,220 names of individuals; using the conservative multiple $2\frac{1}{2}$ times, to represent the names of married women and children not counted indicates a population of

10,552

(This does not mean simply population inside the city limits, but takes in consideration all suburbs included in the Directory.)

In concluding, we desire to thank our patrons for their support and to extend our thanks to the public in general for the courteous way in which nearly everyone supplied our canvassers with the desired data. We shall continue this publication Bi-annually.

Yours truly,

PIEDMONT DIRECTORY CO.,
